Boost your workspace

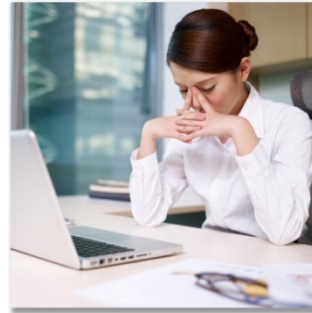

Most people spend 7 hours uninterrupted in a sitting position behind their desk. Since then:

48%
employees
suffer from
back problems

42%
employees
suffer from
neck problems

39%
employees
suffer from
fatigue

38%
employees
suffer from
headaches

**Increased musculoskeletal disorders:
8 à 10% per year**

With the proliferation of screens and current technologies, professionals of health like Frédéric Dutheil, recognized specialist of sedentarity, Director of the Center of Professional Pathologies of the C.H.U. from Clermont-Ferrand alert us to the evolution of our way of life.

The sedentary lifestyle and the reduction of physical activity are now risks to our health and have become a problem major public health.

ORIGIN

/ERGONOMICS

The use of a footrest avoids muscle strain cramps and fatigue of the lower limb.

Top surface made of half PVC spheres that exercise a real relaxing massage.

/FUNCTIONAL

Height (9 to 13,5 cm) and tilt adjustable (10°, 15°, 20°), it enables an individual setting according to the user's morphology

/ECO-FRIENDLY

made of ABS recyclable

Made in France

UPDOWN

/HEALTH BENEFITS

Intuitive and ergonomic

There are more and more height adjustable desks on the market (40% of the market share) and more Occupational medical recommends posture change every 30MINS for a good well being at the office. This is the reason why UNILUX decided to create a new generation of foot rest. UPDOWN can be used:

- in sitting in standing position
- improves circulation and reduces fatigue
- exercise dynamics during your lunch break

/DESIGN

Dynamic lines

With the dynamic and modern design, UPDOWN create a design rupture in the Foot rest family. In addition the foot rest is light and easily transportable everywhere (breakroom, reception, desk,...) thanks to its ergonomic handle.

/PRODUCT + POINTS

Anti-slip silicon design

UPDOWN is equipped at the bottom of both sides with 2 silicone mat feet, that increase the friction, for a solid non-slip.

MOOVE

LIMIT RISKS A 360 DEGREES

fight against a sedentary lifestyle

Following many studies, the sitting position will increase the risk of having heart problems while reducing the life expectancy of 7 years. Indeed, the human body is designed to "move", not, to stay almost motionless for 9 hours a day. Ultimately, this position disrupts the entire body (less oxygenated) which causes an increase in fat cells causing a potential overweight.

A DYNAMIC BASE

Ergonomic and comfortable

Its curved foot promotes a dynamic posture and provides great freedom of movement to adopt the correct posture without hindering movement. The MOOVE seat is ideal to avoid back, lumbar and muscle pain (shoulders, arms, back). Thanks to a perfect alignment of the spine, the whole body "benefits". Indeed, the weight on the basin is reduced, the airways are "open", the cladding is stressed and the blood circulation is much more fluid. In the end, it is proven that sitting / standing stools have a positive impact on productivity, creativity and overall concentration.

We burn 3 times more calories while standing (without walking) than sitting behind our desk.

UNI LUX

R'PURE

/IONISER SYSTEM

Efficient and silent

The indoor air in your office houses potentially harmful particles: Pollution, dust, germs, moisture, pollen, etc: are invisible but are known to aggravate allergies, spread viruses and create odors. The UNILUX air purifier with its electrically charge ionization system (more efficient than a traditional system HEPA filter + fan) eliminates 99.9% of harmful air particles so you can enjoy clean air and a healthy workplace.

/ERGONOMIC

Health benefits

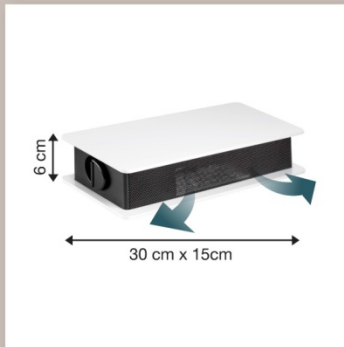

Carbon dioxide (CO₂) is a component of the earth's atmosphere. Although carbon dioxide is invisible and odorless, an increased CO₂ (>1000ppm CO₂ concentration guide) content in the indoor air contributes fatigue, reduces concentration and increase the risk of absenteeism.

In order to minimize these negative impacts on your body, it is recommended to use the R'PURE air purifier which is suitable for a individual space.

TECHNICAL FEATURES

● Dimensions

● Functions

- Ionizer system
- ON/OFF
- S/N: <50db
- Area surface 15m²

UNILUX

R'CLEAN

WHY USE AN AIR PURIFIER?

We spend 90% of our time indoors, and 9 hours each day sharing this space with others. We do not pay much attention to the air we breathe, yet we should. Indoor air is 5 times more polluted than outdoor air. Public spaces, such as offices, are places that are conducive to the proliferation of bacteria, viruses, dust, allergens, chemical vapors and odors. In addition to all these bacteria and other allergens, there is also carbon dioxide (CO₂).

IMPROVED AIR WILL BRING FATIGUE, DECLINE CONCENTRATION AND PRODUCTIVITY, INCREASE IN ABSENTEEISM

DISCREET AND EFFICIENT

R'CLEAN, how it works?

R'CLEAN has been designed to install easily and operate discreetly to enjoy everywhere indoor air healthy and pure. It purifies the air in 4 steps :

- Pre-filter captures and removes large particles and pollutants.
- Activated carbon filter absorbs odors and VOCs.
- The ionization system will electrically charge the harmful particles to weigh them down and thus absorb them more quickly.

Finally R'CLEAN benefits in addition to the UV function. This air treatment is particularly effective against germs, microbes, viruses and bacteria.

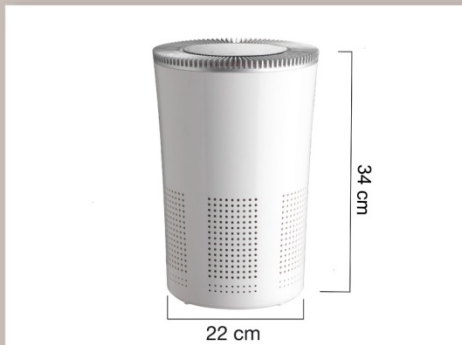

In short, everything that is alive and that is likely to make you sick. In addition, it oxidizes VOCs and odors

**CADR (Clean Air delivery rated): 160m³/h
for a aera of about : 30m²**

TECHNICAL FEATURES

● Dimensions

● Materials

- ABS

● Reference

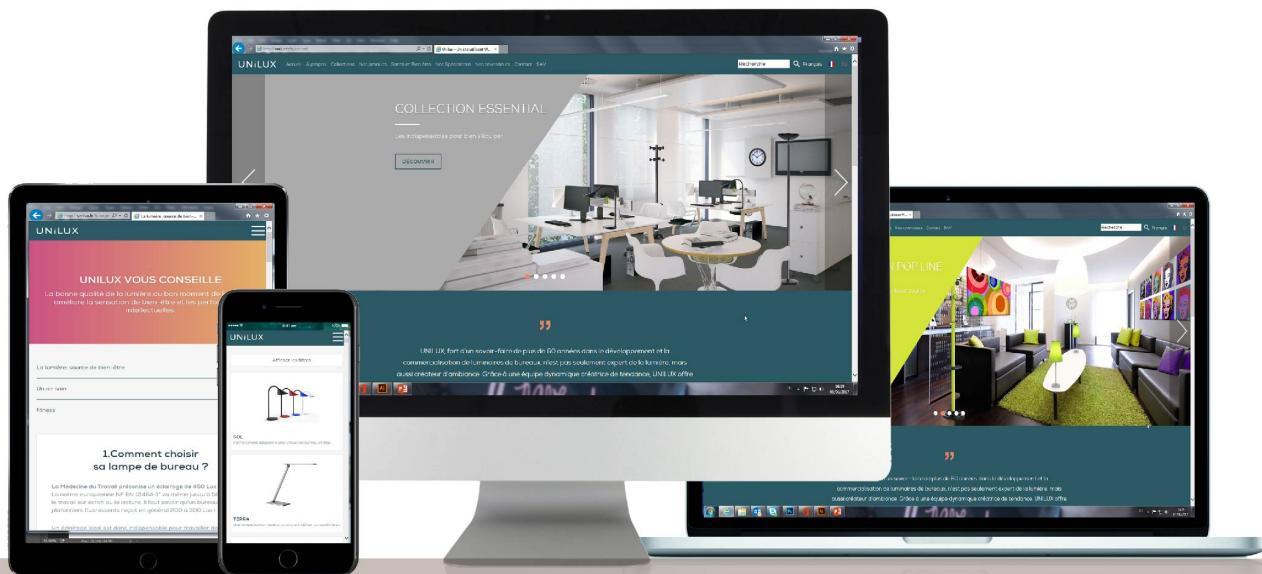

400110240

” *The air purifier designed to clean indoor air in all professional environments!.*

5 levels of filtration

- 1 Mesh Preliminary filter**
Traps larger particules like hair and pet dander.
- 2 True HEPA filtration**
Filters 99.97% of particules as small as 0.3 microns.
- 3 Activated Carbon filter**
Neutralize household odors from cooking, pets & smoke.
- 4 Negative Ion generator**
Helps to remove harmful airborne particules.
- 5 UV light sanitizer**
Remove harmful elements in the air such as mold & germs.
